PURE RACE OLD SNOW GLIDE WAXES

PURE RACE OLD SNOW PURE RACE glidvällor för tävlingsåkaren, tillverkas av råmaterial i pulverform och används som högpresterande tävlingsvalla.

Högkvalitativa kolväten, zinkstearat och kiselvax ger utmärkt prestanda och slitstyrka. Speciellt i gammal snö och konstsnö.

PURE RACE NEW SNOW GLIDE WAXES

PURE RACE NEW PURE RACE glidvallor för tävlingsåkaren, tillverkas av råmaterial i pulverform och används som högpresterande tävlingsvalla.

Högkvalitativa kolväten, zinkstearat och kiselvax ger utmärkt prestanda och slitstyrka. Speciellt i ny snö

PURE PRO GLIDE WAXES

PURE PRO glidvallor som är speciellt framtagna för tävlingsåkaren och den aktiva skidåkaren som önskar bättre glid. Högkvalitativa kolväten, zinkstearat och kiselvax ger utmärkt prestanda och slitstyrka i alla väderförhållanden. Både i nysnö och gammal snö

PURE UP GLIDE WAXES

PURE UP glidvallor som är framtagna speciellt till den aktiva skidåkaren och tävlingsåkarens träningsrundor. Högkvalitativa kolväten, zinkstearat och kiselvax ger bra prestanda och slitstyrka i alla typer av snö och väderförhållanden.

PURE ONE GLIDE WAXES

PURE ONE flytande glidvallor baserade på högkvalitativa kolväteingredienser. Avsedda för den glade motionären och även den aktive skidåkare, för grundpreparering och underhåll. För alla snötyper.

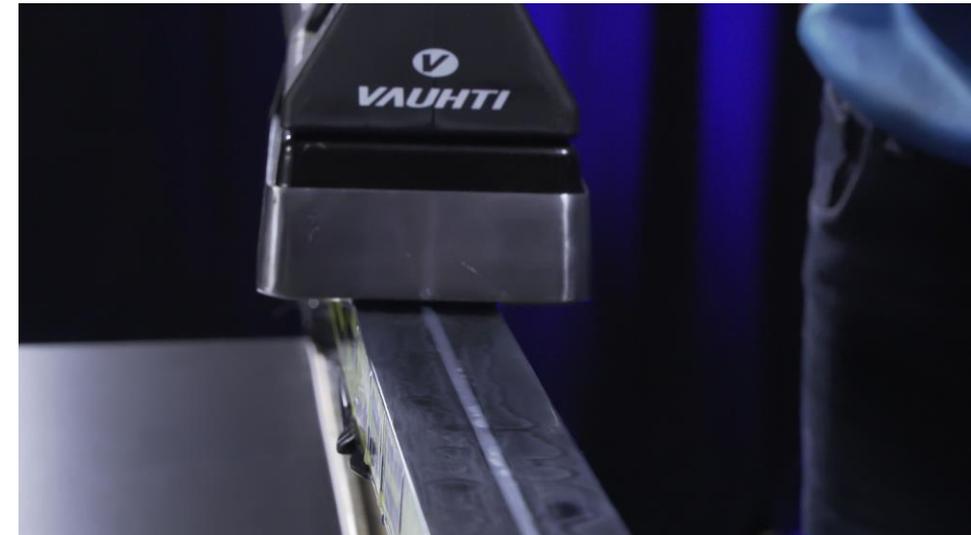

Rengöring av skidor för att göra dem fluorfria.

Innan ni börjar var noga med att er vallautrustning som bord, profiler borstar, sicklar m.m är rengjorda innan ni börjar med stegen nedan:

1. Häll på **"Clean&Glide fluor free"** över belaget, borsta sedan belaget med **"Vauhti 115-01060 Steel brush"** medan vätskan fortfarande är blöt. Låt vätskan torka.
2. Borsta skidan med en ren **"Vauhti 115-01060 Steel brush"**
3. Sedan smält in tex **"Vauhti Pure One Cold"** eller **"Vauhti Servicewax Cold"** en gång.

Återupprepa denna procedur **en gång till** så ska skidorna vara redo för vinterns tävlingar.

LIQUID GRIP WAXES

Liquid grip waxes are suitable for all snow types and they can be applied on ski base easily without any tools. You get thin and even layer easily with sponge and the waxes are very durable. Apply and let it dry perfectly.

80ml

341-LGSBAS
GS BASE SUPER - liquid base grip wax

Durable all temp liquid base wax. Use as base for all other grip waxes.

341-LGSV
GS VIOLET - liquid grip wax
-1/-7°C | 30/19°F

Liquid grip wax for fresh and fine natural snow in mild winter conditions.

341-LGSC
GS CARROT - liquid grip wax
-2/-20°C | 28/4°F

Liquid grip wax for cold winter conditions. Especially old and man-made snow.

341-LKSBA
KS BASE - liquid base klister

All temp liquid base klister. Use as base for other grip waxes or klisters.

341-LKSU
KS UNIVERSAL - liquid klister
+10/-1°C | 50/30°F

Universal liquid klister for wide range of snow conditions from wet and damp snow to zero degrees.

PURE RACE GRIP WAXES - OLD SNOW

PURE RACE grip waxes are especially for old, artificial and coarse snow. Viscous waxes are very durable and thanks to new additive also fast.

RACE RED +3...-1°C

for wet & coarse snow, suitable for coating klisters. Works also when tracks are icy up to -10 C.

RACE LDR 0...-10°C

Universal wax for coarse old and artificial snow, suitable for coating klisters. Good grip properties, but also very fast grip.

RACE BLUE -5...-20°C

for dry old & artificial snow, hard content makes it very fast but without losing the grip.

PURE RACE GRIP WAXES - NEW SNOW

RACE WHITE +3...-3°C

for wet & damp fine grained snow.
Good also in mixed snow conditions
when there is a risk of icing.

PURE RACE grip waxes are especially for
new, natural and fine snow.

Thanks to the new additives glide properties
are much better than with the traditional
synthetic grip waxes.

RACE PINK -1...-5°C

for dry & fine grained falling snow,
suitable for coating LDR klister when
there is a risk of icing.

RACE VIOLET -2...-7°C

for shiny tracks with fine grained snow.

RACE GREEN -5...-20°C

for cold natural snow conditions.

PURE RACE KLISTER

RACE RED +10...+1°C for very wet snow conditions, use as a top layer or mixed with LDR klister. Works also on mixed snow when there is a risk of icing.

RACE VIOLET +2...-6°C use as a middle layer for other klister. Very hard and durable klister, good gliding properties. On its own suitable for old snow when tracks are hard and shiny.

RACE LDR +5...-10 °C universal klister for all snow types from wet to icy tracks. Use as a top layer or can be mixed with other klister. Durable and good gliding properties. Best option when there is a risk of icing or new snow.

RACE BLUE -1...-15°C for very hard and icy snow conditions up to -15 C, especially for refrozen old and artificial snow. Can be used as a base klister for other grip waxes and klister.

KS KLISTERS

KS Red +10...+2°C
For slightly coarse snow and fresh wet snow conditions.

KS Violet +1...-10°C
For coarse wet conditions, just above or below 0°C.

KS Universal +4...-7°C
For coarse wet snow conditions and variable coarse conditions.

KS Blue 0...-15°C
For coarse icy conditions. Extremely well suited as a base wax for grip waxes on coarse and icy snow.

KS BASE for all klisters (and grip waxes, in coarse conditions). Base wax ensuring proper adherence and maximum durability of top wax layers.
